

MUHAMMAD IBRAHIM

Full-Stack Developer (MERN) | React.js · Next.js · Node.js · NestJS | AI-Augmented Engineering & Scalable REST API Architecture

Karachi, Pakistan | +92 321 9213132 | ibrahimkashif792@gmail.com | linkedin.com/in/muhammadibrahim-7b3220367 | github.com/ibrahim08043

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of production experience across the React/Next.js and Node.js ecosystem, architecting and delivering scalable web applications for 50-200 concurrent users in healthcare and travel platforms. Proven track record integrating 50+ REST APIs with JWT-based authentication, optimizing backend performance and database queries, and shipping real-time features with WebSockets and Firebase. Full-stack proficiency across React.js, Next.js, TypeScript, Node.js, Express.js, NestJS, MongoDB, PostgreSQL, and MySQL, with hands-on experience in REST API design, relational and document database schema design, and modular, testable component architecture. Regularly leverages AI-powered development tools (GitHub Copilot, Cursor, Claude Code, ChatGPT) to accelerate debugging, code review, and refactoring cycles. Track record of reducing support tickets, eliminating technical debt, and streamlining workflows through code consolidation and performance optimization, while mentoring a growing team of junior developers in Agile sprints.

TECHNICAL SKILLS

- Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, Ant Design, GSAP, HTML5, CSS3
- Backend & APIs:** Node.js, Express.js, NestJS, RESTful API Design & Development, WebSockets, Firebase, JWT Authentication, Middleware & Request Validation, CRUD Operations, Third-Party API Integration
- Databases:** MongoDB, MySQL, PostgreSQL, Redis, Database Schema Design, Query Optimization, Data Modeling
- Cloud, DevOps & Testing:** AWS, Docker, CI/CD (GitHub Actions), Unit Testing (Jest)
- AI-Augmented Development:** GitHub Copilot, Cursor AI, Claude Code, Codex, Replit, Lovable, ChatGPT, OpenAI API (exploratory use), Prompt Engineering, Agentic AI Workflows, AI-Accelerated Debugging & Code Review
- Dev Tools & Practices:** Git/GitHub, Axios, Postman, Webpack, Vite, Figma, Agile/Scrum, Code Review, Version Control Workflows
- Performance & Architecture:** Code Splitting, Lazy Loading, SSR/SSG, API Optimization, State Management, Modular Component Architecture, System Design Fundamentals

PROFESSIONAL EXPERIENCE

- MERN Stack Developer | Saasify Labs · Remote** Sep 2025 - Present
- Built full-stack applications using React.js, Node.js, Express.js, and MySQL, architecting modular backend and frontend components that reliably supported 50+ concurrent users across multiple deployment environments.
 - Designed and implemented 40+ RESTful API endpoints with custom middleware for authentication, request validation, and centralized error handling, while optimizing MySQL schemas and queries to improve data consistency and response performance.
 - Shipped real-time communication features for 50+ concurrent users using WebSockets and Firebase, backed by JWT-based authentication and cross-service session management.
 - Raised engineering standards by conducting peer code reviews, enforcing consistent TypeScript conventions, and mentoring a team of 3+ junior developers on scalable system design; leveraged AI tools (GitHub Copilot, Claude Code) to speed up code review and catch edge cases earlier.
- Junior Frontend Developer | Sid Techno · Karachi** Mar 2024 - Aug 2025
- Architected and launched the TGI Health Dashboard, a multi-role healthcare platform, integrating 30+ live REST APIs and removing 100% of hardcoded data, improving data consistency across 19+ pages and lowering support inquiries by 35%.
 - Developed a unified design system with Recharts and Ant Design, standardizing UI patterns and improving user engagement across all 19+ dashboard pages.
 - Diagnosed and fixed critical Next.js build failures (invalid exports, tsconfig misconfigurations), restoring functionality across 40+ routes.
 - Led a full-site theme migration across 40+ routes with robust state handling, removing runtime errors and improving SEO performance.
 - Consolidated 15+ modals into a single reusable component, shrinking related codebase size by 70% (1,200+ lines) and streamlining developer workflow efficiency.
- Frontend Developer Intern | Sid Techno · Karachi** Dec 2023 - Feb 2024
- Developed responsive, mobile-first applications using HTML5, CSS3, JavaScript, and React.js.
 - Converted 20+ Figma designs into pixel-perfect, cross-browser compatible components, reducing design-to-dev revision cycles.
 - Connected 16+ REST APIs using Axios with structured error handling and client-side state management.
 - Strengthened code quality through peer reviews while collaborating in an 11-member Agile team environment.

KEY PROJECTS & TECHNICAL OUTCOMES

- TGI Health Dashboard — Multi-Role Healthcare Portal** Mar 2024 - Aug 2025
- Next.js · TypeScript · Redux Toolkit · Recharts · Ant Design · REST APIs · JWT Authentication · Node.js/Express API Integration

- Integrated 30+ REST endpoints with JWT authentication, pagination, request retries, and centralized error handling, achieving zero data inconsistencies through rule-based, API-first rendering across 19+ pages.
- Designed a unified, reusable design system (Recharts + Ant Design) covering earnings, scheduling, and patient-record visualizations, deployed across all dashboard pages with fully responsive layouts.
- Refactored the authentication flow (login, forgot/reset password, two-column layout, automated image carousel), cutting login-related support tickets by 35%.
- Applied AI-assisted tools (Claude Code, GitHub Copilot, ChatGPT) throughout development to speed up debugging of production issues and TypeScript refactors, shortening several fix cycles from days to hours.

Red Carpet Journey — Luxury Travel Platform

Apr 2024 - Jul 2025

Next.js 15 · TypeScript · Tailwind CSS · GSAP · WebSockets

- Identified and resolved Next.js 15 build pipeline failures affecting 40+ routes, correcting invalid page exports and tsconfig misconfigurations.
- Executed a dark-to-light theme migration with localStorage persistence, maintaining state consistency across 100+ tour listing pages.
- Eliminated GSAP scroll-animation conflicts (scrub/toggleActions incompatibilities) on celebrity/artist pages and cleared 404 errors by untangling prop-vs-route parameter resolution logic.
- Employed AI-augmented debugging (Cursor, ChatGPT) to isolate routing and animation-conflict root causes faster, reducing time spent on several hard-to-reproduce bugs.

TGI Tours Admin Panel — CRM & Booking Management

Feb 2024 - Aug 2025

React · TypeScript · Ant Design · Redux · Axios

- Consolidated 15+ separate modals into a single Drawer component with inline role-switching, trimming codebase size by 1,200+ lines (70% reduction) and accelerating admin workflows by 25–30 seconds per task.
- Standardized a reusable phone-input component across user management, booking, and affiliate modules while maintaining a consistent brand color system.
- Delivered an accounting module (Outstanding Balances, Partner Payouts, Refunds & Cancellations) using Axios, error boundaries, and pagination; corrected Redux thunk stale-closure bugs and Axios undefined-parameter handling to improve reliability.
- Paired GitHub Copilot and Claude Code to accelerate refactoring of Redux slices and reusable components during the consolidation effort.

EDUCATION

Bachelor's Degree in Computer Science — IQRA University, Karachi	2024 - Present
Intermediate (H.S.C.) — Nusrat Bhutto Government College, Karachi	2020 - 2024

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

MERN Stack Development — Jawan Pakistan
